GREENline

The **GREEN** line was designed to allow you to benefit from all the advantages offered by Ambrogio's simple and innovative technology. The four models of the line, all with brushless motors, ensure excellent cutting and nutrition of the turf, resulting in a greener, lusher, and healthier lawn in a completely eco-friendly way. The models are very compact for small gardens and have the ability to hand the most difficult slopes and up to 4 different areas.

The logo for AMICO, featuring the word "AMICO" in a bold, black, sans-serif font. The letter "O" is stylized with a heart shape inside it. The logo is set against a green rectangular background with rounded corners.

Ambrogio is a friend to all animals and respects their need for space.

AMICO is the new technology bearing the ZCS logo that ensures the safe operation of Ambrogio robot near animals wearing an AMICO, until the automatic shutdown of the blade. A micro device to be put on an average/large-sized pets's collar, or on its back, as in the case of a tortoise. The AMICO tag communicates with Ambrogio robot as it approaches any animal with the tag.

AMICO is harmless and safe.

With the ZCS CONNECT MODULE* the future is here and now!

Geographic localisation

The robot is localised on the map

Geofence alarm

An evolved anti-theft device

Go away

Temporarily exclude a particular area of the garden

Go Home

To send the robot to recharging base

***The functions available for the L60 model are:
Remote monitoring of the robot status |
Receive notifications in case of error |
Receiving Geofence notifications | Stop the robot***

Infinity System

+INFINITYSYSTEM, through the Cloud technologies and ZCS Connect, creates a constantly shared virtual map on the area to be mowed. The shared map allows robots to know the already cut micro areas optimising the working time, without neglecting any area and with maximum precision. The robots equipped with **+INFINITYSYSTEM** have the ability to readjust themselves to work in areas that have increased their surface over time. External areas which become "yards" can be managed in a perfect combination with all the other green spaces.

The **+ INFINITYSYSTEM** system is recommended for the maintenance of medium/large spaces up to very large areas such as sport fields, airfields and gol courses.

Voice Control

Ambrogio robot speaks the language of the future!

The models equipped with ZCS Connect are able to communicate with the most popular voice assistants (Apple's Siri, Google Home and Amazon's Alexa). The function allows you to control the robot with simple voice commands, without using an APP or a display, but remotely, via a simple internet connection.

franckreporter Già da tempo tramite le mie stories lo avete conosciuto. Lui è Ambrogio, 🚗 il mio maggiordomo del giardino (quello che mi taglia l'erba e mi fa riposare.. pensa a tutto lui) . Me lo stanno facendo provare i ragazzi di @ambrogiorobot . Prima avevevo sempre un Ambrogio, il nonno di questo :), devo dire che in questi anni sono stati fatti enormi passi avanti dalla tecnologia e lui ne è la prova. #AmbrogioRobot #lawnmower #lawncare #lawnmowing

You have known him for some time through my stories. He is Ambrogio, my garden steward (the one who cuts the grass and makes me rest .. he takes care of everything). The guys from @ambrogiorobot are letting me try it. Before, I used to own an older version of this one, I must say that in recent years enormous progress has been made in technology and Ambrogio is proof of this.
